CONIFEROUS EVERGREENS

Our Evergreens are pruned consistently throughout the summer and are now in nice shape ready for immediate use in landscape work. Even the Chinese Arborvitaes (Thuja orientalis) have been several times pruned and are therefore compact.

All evergreens are B & B unless in pots or puddled. We have designated the ones that we think will go through in good shape a reasonable distance simply by puddling in stiff clay.

This applies to both conifers and broad-leaved.
